SUMMARY

Software Engineering student in the 7th semester (expected graduation: December 2026), focused on full stack web development with React, Next.js, TypeScript and Supabase. For the past three years I have worked in the administrative area of a charter and corporate transportation company, where I took over the technology needs and built an internal web system that is now used every day by the finance, HR and sales teams. Looking for a junior developer position to keep growing technically within an IT team.

SKILLS

Languages & frameworks	HTML, CSS, JavaScript, TypeScript, React, Next.js, React Native, Python
Data & backend	Supabase, SQL / PostgreSQL, NoSQL
Tools	Git, GitHub, GitHub Actions (CI and automation), Vercel, Material-UI
IT support	Windows, Linux, Google Workspace, Microsoft Office, hardware and troubleshooting, networking (TCP/IP, DNS, resource sharing), Active Directory (basic)
Methodologies	Agile (Scrum and Kanban)
Spoken languages	Portuguese (native) · English (intermediate, B2) · Spanish (basic)

EXPERIENCE

Administrative Assistant — Expresso Porto Real de Transportes Campinas Ltda. May 2023 – Present

- Built and maintain the company's internal web system on my own: 18 modules used daily by the finance, HR and sales teams (29k+ lines of code, 335 commits).
- Customer and supplier service; preparation and follow-up of quotes.
- Organization of documents and administrative processes; information control with Microsoft Office.
- Operational and financial support; traffic fine management.

PROJECTS

Management System for a Charter Company — *in production, company where I work*

Next.js · React · JavaScript · Supabase · PostgreSQL · Material-UI · GitHub Actions · PWA

- Replaced spreadsheets and manual processes, from trip quotes to the monthly closing: quotes with map-based routes and distance pricing, driver schedules, commissions, payments, per-vehicle monthly closing and document expiration alerts.
- Real-time updates between users, offline mode with automatic sync, individual login and per-user permissions.
- PWA with push notifications, daily backups and automated tests (GitHub Actions); integrations with map, routing, ZIP code and company registry (CNPJ) APIs.

Velloso Finance — *personal project, in development*

Next.js (App Router) · TypeScript · Supabase · Pluggy API (Open Finance)

- Personal finance management app with Google OAuth and email/password authentication.
- PostgreSQL data modeling with JSONB fields and per-user Row Level Security policies.
- Open Finance integration through the Pluggy API to import transactions automatically; responsive UI with light/dark theme.

Go Viagem — *university extension project, 2026*

React Native · Expo

- Mobile trip planning app with screen navigation, local data persistence and API consumption; documented from requirements gathering to delivery.

Hospital Exam Quote System — *academic project*

- Web application with a relational database to register procedures and issue exam quotes.

EDUCATION

Bachelor's in Software Engineering — Wyden Uni Metrocamp Feb 2023 – Dec 2026 (expected)
